

MINWARA Distinguished Speaker Series
14 September 2023
Mine Warfare Association
RAND Corporation (at Metro Tower)
1200 South Hayes Street, Arlington, VA 22202-5050

FREQUENTLY ASKED QUESTIONS

Q. Will transportation be provided?

A. No, each tour participant is responsible for their own transportation.

Q. Where do I park?

A. Pentagon City mall

Q. How do I access the building?

A. RAND's Washington Office is located in Metro Tower at Pentagon City, which is attached to the Fashion Centre at Pentagon City shopping mall, just off Interstate 395, near both the Pentagon and Reagan National Airport. The building front is located on South Hayes Street in Arlington, to the right of the Ritz Carlton Hotel.

***Entering the Building:** Enter the Metro Tower at Pentagon City from the lobby off of Hayes Street, to the right of the Ritz Carlton. The lobby entrance will be on your right as you approach the entrance to the mall. Visitors without a RAND ID will be asked to show valid government-issued photo identification and check in with the Metro Tower security guard at the building lobby. You may then take the elevator to the fourth floor and check in at the RAND reception desk.*

***Metro Access:** RAND is located above the Pentagon City Metro station, which is served by both the blue and yellow lines. There are two options for arriving at RAND's lobby from the metro. First, after passing the fare card vending machines, take a left and proceed up the escalators on the left-hand side. When you come out of the metro, you will be at the street level, and the Metro Tower will be to your right. Alternatively, after passing the fare card vending machines, take a left and proceed straight ahead to the mall entrance. After you arrive at the food-court level, take the escalator up one level to the main floor, proceed toward the left, and you will see a mall exit. The entrance to the Metro Tower at Pentagon City will be on your left, just outside the mall exit.*

Q. Mobile Device Restrictions?

A. Attendees are not allowed to record presentations on their mobile device and/or personal Portable Electronic Devices (PEDs) like cell phones, laptops, iPads, smartwatches, and fitness trackers that have storage or Wi-Fi and Bluetooth capabilities.

Q. If I have a question about the event, who should I contact?
